NetScape Navigator → A web browser which used to dominate the world of in 90's with the market share of around 90%.

This is where the story of JavaScript starts from. And Netscape in 1995.

Static websites → websites used to be static then. And browsers could not do even a single calculation at that time.

In order to do even a simple math, browsers had to talk to server.

JavaScript is a Synchronous Single Threaded Language.

Making the language of web → So the founder of Netscape decided to develop a programming language for his Netscape.

Founder of Netscape → Marc Andreessen.

First Public Browser Name?

Making the language of web → In September 1995 Andreessen hired one guy called Brendan Eich to develop that language.

Creator of JavaScript → Brendan Eich.

Development of JavaScript → Brendan starts the development and the rest is history. He developed the whole new language in just a few days.

And that language was called "Mocha". Then it was changed to "Live Script" and then finally "JavaScript".

In 2007 →

Any application that can be written in JavaScript will eventually be written in JavaScript.
